SUMMARY

Computer Science student and full-stack engineer with hands-on experience building API-driven platforms, data pipelines, and scalable backend services, including AI/ML-powered products. Shipped production REST APIs and multi-service backends (Next.js, Node.js, Express.js) that unify live third-party data feeds, plus an automated payout and trust-scoring service built around real latency and correctness constraints. Open-source contributor with merged pull requests in a CNCF project. Currently a Student Intern at Nokia.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, Go, Ruby, SQL, Scala, C, C++, HTML/CSS
- **Backend / APIs:** Node.js, Express.js, REST API design, OAuth 2.0, third-party APIs (Razorpay, WhatsApp Business, Yahoo Finance, weather/AQI feeds)
- **Data & Services:** Live multi-source data pipelines, trust-scoring/payout pipelines, geospatial processing (Google Earth Engine)
- **AI / ML:** LLM APIs (NVIDIA AI / Llama 3.1 70B), multi-agent design, scikit-learn, XGBoost, Isolation Forest, ONNX, NLP
- **Frameworks & DBs:** Next.js, React, Streamlit, Tailwind CSS, Vite | Supabase (PostgreSQL), MongoDB
- **Cloud & Tools:** AWS, Google Cloud Platform, Docker, Vercel, Render, Linux, Git/GitHub, Postman

EXPERIENCE

Student Intern – Nokia 2026 – Present

- Working with Nokia engineering teams on software development tasks, contributing code and learning production engineering practices.
- Collaborating with mentors and teammates through code reviews, documentation, and agile workflows.

Remote Sensing & GIS Intern – Indian Space Research Organisation (ISRO) July 2025 – Aug 2025

- Analyzed multi-spectral satellite datasets in Google Earth Engine for NDVI / vegetation-stress mapping across large regions.

Full-Stack Developer – Jain Kante Wale (Logistics) June 2023 – Sept 2023

- Built a WhatsApp-integrated complaint management system (Node.js, Express.js, WhatsApp Business API) for a live client, cutting response latency by 60%.

OPEN SOURCE CONTRIBUTIONS

Meshery (CNCf Cloud Native Project, 11.4k stars) github.com/meshery/meshery

- Authored and merged PR #20796 and #20790, reviewed and approved by maintainers including project lead Lee Calcote. Onboarded via the MeshMate mentorship program and picked up follow-on issue #20803.
- GitHub Pull Shark achievement for sustained pull requests across 10+ public repositories, including TensorFlow.

PROJECTS

OffShift – Smart Income Shield for Gig Workers Next.js, TypeScript, Node.js, Supabase, Razorpay

- Built an AI-powered parametric insurance platform for India's 12M gig delivery workers, with a REST API backend and PostgreSQL data layer.
- Integrated live feeds (IMD weather, AQICN air quality, Downtdetector outages) into one backend service layer feeding risk models.
- Built a 3-tier trust-scoring system feeding a 120-second Razorpay payout pipeline, backed by an XGBoost pricing engine and a 6-layer fraud-detection system (Isolation Forest + behavioral analysis).

ET-Concierge – AI Financial Twin (Multi-Agent System) Next.js, React, NVIDIA AI (Llama 3.1 70B), Yahoo Finance API

- Built the first AI-powered Financial Twin for The Economic Times ecosystem at ET AI Hackathon 2026, with intent, twin-extraction, market-data, and product-mapping agents around a shared service layer and real-time Sensex, Nifty, and Gold polling.

PlanetPulse – Carbon Footprint Tracker Next.js 15, TypeScript, Tailwind CSS, Recharts

- Built a CO₂ tracker with category dashboard, weekly targets, filterable history, REST API, and outlier validation for absurd inputs.

CareerSeed AI & Phishing Detector Python, Streamlit, NLP, scikit-learn, Chrome Extension

- CareerSeed: NLP resume parser that matches job descriptions and suggests ATS keywords. Phishing Detector: ML classifier shipped as a Chrome extension with instant inference.

EDUCATION

GLA University, Mathura – B.Tech in Computer Science and Engineering 2023 – 2027

Certifications: AWS Educate (GenAI/ML) | Google Cloud Trust & Security | Full Stack Dev (Java), KVCH | SQL (Basic), HackerRank
